

Hon Mr Bosbyschell

Dear Sir

I have taken the liberty of sending you by this to days mail, a copy of one of our County papers containing an article on "Our Coinage" written by myself and for which I ask your fair consideration - I ~~have~~ as a patriotic citizen always have taken a great interest in our coinage & long hoped to see it brought to such a state of perfection as to be beyond any more abortive changes & be a Model for other nations. I don't think there is a coinage in existence that was built up from the beginning on a scientific basis forming a complete whole - The coins of Europe seem to have been made at the caprice of Monarchs, just to suit some particular want - just as our 3 cts was made to pay postage. I believe our coinage can be put into such a shape that it will satisfy every want of trade and be so acceptable to the public as to preclude

any repetition of the former ridiculous meddling with it & I beg you to use your influence to bring about such a desirable change

I have corresponded on this subject with the Hon Mr Bartine H R who is on the House Coinage committee & I think he will favor my suggestions

I will send a copy of my article to him and also to Hon Mr Leech Director & to Mr Halford to shew it to the President - I could write a good deal more

but I was a business man once & know something of the art of "stopping" - I only ask that you will give my "article" a fair reading - I am an old native Philadelphia - moved from there in 1869 & for 20 years past living a retired life in Western Penna

Your neighbor Robt C Ogden Esq. Mr Wandmakers partner can tell you all about me" - As I should like to know if you get this letter & the paper I inclose a directed card to drop into your out going mail

I don't ask you to write - I can identify the card on its return

yours Very truly

[Abstract:] Sends copy of paper containing an article on “Our Coinage”

Hon Mr Bosbyshell

Dear Sir

I have taken the liberty of sending you by ~~this~~ to days mail, a copy of one of our County papers containing an article on “Our Coinage” written by myself and for which I ask your fair consideration. I ~~have~~ as a patriotic citizen always have taken a great interest in our coinage & long hoped to see it look [?] to such a state of perfection as to be beyond any more abortive [?] changes & be a model for other nations. I don’t think there is a coinage in existence that was built up from the beginning on a scientific basis forming a complete whole. The coins of Europe seem to have been made at the caprice of Monarchs, just to suit some particular want, just as our 3 ct pr coin [?] made to pay postage. I believe our coinage can be put into such a shape that it will satisfy every want of trade and be so acceptable to the public as to preclude any repetition of the former ridiculous meddling with it & I beg you to use your influence to bring about such a desirable change.

I have corresponded on this subject with the Hon Mr Bartine HR who is on the House Coinage committee & I think he will favor my suggestions. I will send a copy of my article to him and also to Hon Mr Leech Director & to Mr Halford to show it to the President. I could write a good deal more but I was a business man once & know something of the art of “stopping”. I only ask that you will give any “article” a fair reading. I am an old native Philadelphia – moved from there in 1869 & for 20 year past living a retired life in Western Penna. Your neighbor Rob’t C Ogden Esq. Mr Wanamakers partner can tell you “all about me”. As I should like to know if you get this letter & the paper I in-close a directed card to drop into your outgoing mail. I don’t ask you to write. I can identify the card on its return.

Yours very truly
HR Cowell
